PROJECTS

1. Bank Management System:

- Description: Developed a Java-based banking application using Hibernate for seamless data management. The application supports essential banking operations, such as account creation, fund transfers, and balance inquiries. Implemented a modular design for code clarity and used Hibernate for efficient database interactions.
- Technologies/Tools: Core Java, OOPS, Hibernate, Eclipse IDE, MySQL.

2. Student Management System:

- Description: Designed and implemented CRUD application for student management using Java and Hibernate. The application allows users to perform operations such as adding, viewing, updating, and deleting student data stored in a relational database.
 - Technologies/Tools: Core Java, OOPS, Hibernate, Eclipse IDE, MySQL.
-

EXTRACURRICULAR ACTIVITIES
